U.S. IMPORTS BY AIR

*general imports
of merchandise*

U. S. DEPARTMENT OF COMMERCE
Luther H. Hodges, Secretary

BUREAU OF THE CENSUS
Richard M. Scammon, Director

A. ROSS ECKLER, Deputy Director
HOWARD C. GRIEVES, Assistant Director

Foreign Trade Division
DINO S. VILLA, Chief

United States import statistics are compiled from information verified by Customs Examiners on import entries filed with Customs by importers. Under the direction of Lester D. Johnson, Acting Commissioner of Customs, the primary responsibility for the verification of import statistical information is assigned to the field and headquarters staff of the Division of Appraisement Administration.

SUGGESTED BRIEF CITATION

U.S. Bureau of the Census, United States Airborne General
Import Statistics, Report FT 380, August 1964.
Washington, D.C. December 1964.

For sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402 and Department of Commerce Field Offices. Price 15 cents (single copy). Subscription price: \$1.00.

GENERAL EXPLANATION

COVERAGE

General imports are a combination of imports for immediate consumption and entries into bonded warehouses. The statistics include government as well as nongovernment shipments of merchandise by air from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. United States trade with Puerto Rico and with United States possessions and trade between United States possessions are not included in this report but imports into Puerto Rico from foreign countries are considered to be United States imports and are included. Merchandise shipped through the United States in transit from one foreign country to another, when documented as such through United States Customs, is not reported as imports and is excluded from the data shown in this report. (Foreign merchandise which has entered the United States as an import and is subsequently re-exported is not treated as in-transit merchandise, and is included in this report.) Imports of household and personal effects, imports by mail and parcel post, and imports of airplanes under their own power are not included. The air general import statistics reflect fully compiled data for formal entry shipments valued at \$100 and over. Import shipments by air reported on formal entries valued at less than \$100 are excluded from the air import statistics. These under \$100 formal entry air shipments amount to less than one percent of the total air import value and shipping weight. Informal entry shipments valued \$250 or less are included in the air statistics on the basis of estimates made from a 10 percent sample of such shipments.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment which enters the United States. Statistical factors of country of origin, net quantity, value, and commodity classification are verified or corrected as necessary by Customs examiners on all formal consumption and warehouse entries. This verification of statistical data is made at the time the examiner reviews invoices and samples of merchandise for duty and other Customs purposes, and the statistical copy of the entry is corrected by the examiner at that time if he finds that it does not accurately reflect the information called for by the statistical requirements.

VALUATION

The dollar value shown in the import statistics is defined generally as the market value in the foreign country, excluding the United States import duties, air freight and insurance.

SHIPPING WEIGHT

Shipping weight figures represent the gross weight of shipments, including the weight of containers, wrappings, crates and moisture content. This report does not include shipping weight data for informal entries (Schedule Y number 998) since this information is not required to be shown on such entries. The dollar value of air informal entry shipments is approximately 3 to 4 percent of the total air import value. Some rough indication as to the volume of shipping weight represented by the informal air entries may be obtained by reference to the air export statistics where low valued shipments (under \$100) are approximately 2 to 3 percent of the air export value and from 10 to 12 percent of the air export shipping weight.

COMMODITY INFORMATION

The commodity information is presented in terms of Schedule Y, Statistical Classification of Imports into the United States by "Air" Arranged in Shipping Commodity Groups. Effective September 1963, the Schedule Y commodity information represents groupings of data originally compiled in accordance with the classifications in Tariff Schedules of the United States Annotated (TSUSA), which replaces Schedule A, Statistical Classification of Commodities Imported into the United States, under which import statistics were previously compiled. Copies of Schedule Y are available upon request to the Bureau of the Census. Except for Schedule Y number 998, the Schedule Y commodity classifications exclude data for informal entry shipments valued \$250 or less. (They also exclude formal entries valued less than \$100, as mentioned under Coverage, above.) Estimates for informal entry shipments, based on a 10 percent sample, are included under Schedule Y number 998 by country of origin. The variability due to sampling in the estimated total for informal entry shipments valued \$250 or less (the commodity total for Schedule Y number 998) is about 3 percent. The estimates by country under Schedule Y number 998 are subject to sampling variability greater than 3 percent. For detailed indications of the effect of sampling on the estimates for informal imports by country see the General Explanation in front of Report No. FT 390, United States Airborne General Imports of Merchandise, Country of Origin by Commodity. In general terms, estimates by country of informal import entries under Schedule Y number 998 of \$100,000 or more are subject to a sampling variability of less than 10 percent; those of about \$40,000 - \$100,000 are subject to a sampling variability of 10 to 20 percent; those of about \$10,000 to \$40,000 are subject to a sampling variability of about 25 to 35 percent; and estimates of less than \$10,000 generally are subject to a sampling variability of from \$2,000 to \$4,000. In order to obtain information on the commodity composition of air informal entries (Schedule Y number 998), it is planned

to select a small sample of such shipments and code them in terms of Schedule Y. It is hoped that commodity information on this sample will be sufficiently reliable to be released on an annual basis.

COUNTRY OF ORIGIN

The country reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined or manufactured (which may not be the country in which the merchandise was laden on the aircraft which brought it to the United States). Where the country of origin is not known, the country of shipment is shown. Countries are reported as defined in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Copies of Schedule C are available upon request to the Bureau of the Census.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report will be shown in the back of subsequent issues

of the report.

SOURCE OF FURTHER INFORMATION ABOUT AIR IMPORT STATISTICS

Further information regarding import statistics is contained in the General Explanation of Report No. FT 110. A complete discussion of the compilation procedures and coverage for import statistics in general will be found in the foreword to the latest edition of Foreign Commerce and Navigation of the United States (copies are available for reference at public libraries). Special announcements of interest to users of air import statistics will be included in this report. A Catalog of United States Foreign Trade Statistical Publications is also available. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, requests should be made to the Bureau of the Census.
